

Docteur Laurent LAFOSSE

Member of the American Shoulder and Elbow Surgeons

Guest Professor at the Harvard Shoulder Department, Boston, USA

Ordinary Member of the European Society for Surgery of the Shoulder and Elbow

Annecy, February 7th, 2011

To whom it might concern,

Dr Mikel Gutierrez Aramberri is doing a fellowship for shoulder surgery at our **ALPS SURGERY INSTITUTE** since February 1st 2009 to July 31st 2009, as well as the month of November 2008.

The Alps Surgery Institute is a well known Shoulder private school dedicated to shoulder arthroscopy and arthroplasty seated in the Clinique Generale in Annecy, France.

Dr Mikel Gutierrez Aramberri worked as a shoulder surgery fellow under the supervision of Drs. Laurent Lafosse and Bruno Toussaint for the period of seven months.

When **Mikel Gutierrez Aramberri** joined our team he already had a thorough knowledge and a good level of surgical experience which he could intensify here.

We consider **Dr Mikel Gutierrez Aramberri** as a fully trained very advanced arthroscopic shoulder surgeon. He will be part of the best shoulder surgeons and is already able to manage the most difficult problems of shoulder surgery.

He is contributing to patients care, participating actively to all the interventions and research activities as well as preparing the international meetings in which he is involved in Annecy.

Mikel has been a wonderful fellow working with passion, always ready for giving his best. He contributes to the life of our unit. He will, for sure, have a successful career due to his skills but even due to the way he drives his life. I hope this motivation he showed during his fellowship will go along his professional life. He will be welcome anytime.

Dr. Laurent. Lafosse

Chairman of Alps Surgery Institute
